

OmegaGuard®

Helps reduce the risk of heart disease*

GET TO KNOW OMEGAGUARD

Heart disease is America's leading cause of death and there are numerous factors that can increase your risk.

OmegaGuard provides a **full spectrum** of seven **ultra-pure, pharmaceutical grade omega-3 essential fatty acids** naturally found in small, cold-water fish

- Helps maintain a healthy heart and cardiovascular system*
- Helps retain healthy triglyceride levels*
- Contains all seven omega-3 fatty acids
- Small size for easier swallowing

IS OMEGAGUARD RIGHT FOR YOU?

- ✓ If you are concerned about reducing your risk of heart disease*
- ✓ If your diet doesn't include two servings of omega-3 rich fish each week

NOTE: If taking blood thinning medications, consult your physician prior to use. Discontinue use two weeks before surgery.

THE SHAKLEE DIFFERENCE

**The power of nature,
unleashed by science.
Safe. Proven. Guaranteed.**

At Shaklee, we are committed to innovating through science and looking to nature for the answers that can provide healthier lives. We ensure the highest quality and safety standards—conducting over 100,000 quality tests per year to ensure our products are safe for you and your family.

OmegaGuard

To ensure purity and potency, the fish oil in OmegaGuard undergoes a proprietary state-of-the-art multi-step molecular distillation process that:

- Concentrates natural, beneficial omega-3 fatty acids including EPA & DHA
- Removes lead, mercury, arsenic, cadmium, dioxins, PCBs, and other contaminants
- Reduces oxidation and formation of trans fats
- Minimizes odor and fishy aftertaste

The fish oil found in OmegaGuard comes certified by Friend of the Sea®, an international conservation organization that follows strict criteria for sustainability. Friend of the Sea tracks fish populations and works with fishermen to set catch limits and avoid harvesting during spawning seasons. Their efforts help ensure a constant supply of high-quality fish oil for Shaklee products without harming the environment.

*Supportive but not conclusive research shows that consumption of EPA and DHA fatty acids may reduce the risk of heart disease.

See nutrition information for total fat and saturated fat content.

*These statements have not been evaluated by the Food and Drug Administration. These products are not intended to diagnose, treat, cure, or prevent any disease.
