

Vita-D₃ Essential for calcium absorption

GET TO KNOW VITA-D₃

Are you one of the approximately 80% of Americans with insufficient vitamin D levels? Most people don't get enough from food alone, and depending on where you live, the time of year, and other factors, you may not be getting the vitamin D you need. Why? Lack of sun exposure. Vitamin D is considered the "sunshine vitamin" because it's produced as sunlight touches your skin. Very few foods in nature contain vitamin D, and fortified foods (primarily milk) provide most of the vitamin D in the American diet.¹

Vitamin D plays a **major role in protecting your health** and is vital for overall well-being. Vita-D₃[®] provides **1,000 IU of high potency vitamin D₃** to help your body thrive.*

- Aids in calcium absorption for maintaining strong bones and teeth*
- Helps support healthy heart function*
- Helps promote immune health*
- Facilitates healthy cell development*

IS VITA-D₃ RIGHT FOR ME?

- ✓ If you may be lacking in adequate Vitamin D through diet or sun exposure
