

VIVIX®

40% ⚡ 👁

Slow aging at the cellular level®*

GET TO KNOW VIVIX

Cells are continuously damaged by environmental exposure, and even the simple act of eating a meal can result in the formation of free radicals. Free radicals can damage cell components like DNA and trigger inflammatory reactions

in healthy people that are thought to contribute to cellular aging. To help keep cells vital and strong, Shaklee scientists developed **Vivix®**.

THE SHAKLEE DIFFERENCE

The power of nature,
unleashed by science.
Safe. Proven. Guaranteed.

At Shaklee, we are committed to innovating through science and looking to nature for the answers that can provide healthier lives. We ensure the highest quality and safety standards—conducting over 100,000 quality tests per year to ensure our products are safe for you and your family.

- Backed by five patents, Vivix® is a scientific breakthrough designed to help protect and repair DNA at the cellular level*
- Contains an all-natural blend of a broad spectrum of polyphenols, with key ingredients designed to help protect and repair DNA to Slow Aging at the Cellular Level®*
- Key ingredients in Vivix® have been shown in laboratory studies to activate cellular defenses, neutralize free radicals, and slow the development of damaging AGE proteins that may accumulate and lead to cellular aging*
- Supports healthy vision*

Powerful results in laboratory and clinical studies:

- **HELP YOUR CELLS REPAIR AND PROTECT AGAINST DAILY DAMAGE:** Laboratory studies show that **Vivix®** key ingredients protect and repair DNA at the cellular level. In a clinical study, key ingredients were shown to blunt the inflammatory response of healthy people to an unhealthy meal, which can lead to cellular aging over time.*

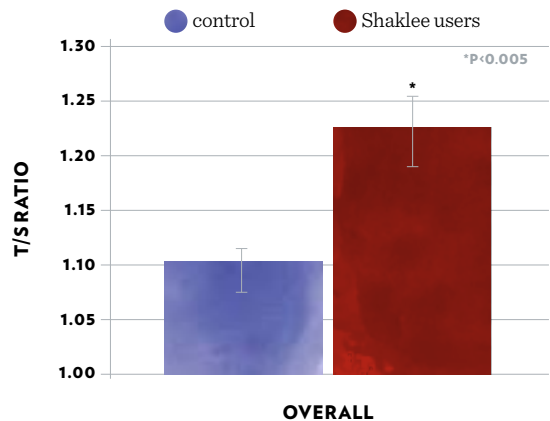

DNA DAMAGE

Daily stress, eating a meal,
environmental exposure

- **40% LOWER RATE OF TELOMERE SHORTENING:** In a preliminary clinical study, Shaklee users who took **Vivix®** had a 40% lower rate of telomere shortening across the adult age range compared to a healthy control group. Telomeres are molecular protective caps of repetitive DNA at the end of chromosomes. Over time, our telomeres gradually become shorter and telomere length is thought to be a marker of overall health.

SHAKLEE USERS HAD LONGER TELOMERES*

13x
MORE POWERFUL
THAN RESVERATROL ALONE

13X MORE POWERFUL THAN RESVERATROL ALONE IN SLOWING A KEY MECHANISM OF AGING**

**In laboratory studies, Vivix key ingredients help slow the formation of AGE proteins, which can lead to cell damage.*

VIVIX®

Slow aging at the cellular level®*

THE SHAKLEE DIFFERENCE

Vivix® is a scientifically advanced, proprietary blend based on the **muscadine grape**— one of nature's rarest, most potent fruits.

- Muscadine grapes contain the full complement of polyphenols found in other grapes
- Unlike other grapes, muscadine boasts superior concentrations of ellagic acid and ellagitannins that, when combined with other polyphenols, yield immense antioxidant power
- We harness this muscadine grape power in every bottle of **Vivix®** using a patented extraction process that concentrates and preserves bioactive polyphenols

BETTER TOGETHER

Vivix® Liquigels are also available as part of the **best, most comprehensive nutritional system in the world, Shaklee Life**. The Shaklee Life-Strip delivers pure, potent vitamins, minerals, omega-3 fatty acids, polyphenols, antioxidants, and phytonutrients to help **create the foundation for a longer, healthier life.***
