Life-Strip

- Features the patented **Shaklee Micronutrient Advanced Release Technology™** (S.M.A.R.T.™) delivery system designed to dramatically improve absorption of key nutrients in the body.
- The research behind Life-Strip includes more than 125 published scientific papers and presentations from studies supported by Shaklee. Studies include:
 - **The Landmark Study**
 - Conducted in collaboration with the University of California Berkeley
 - The first study of long-term users of multiple supplements
 - Showed that **people who used Shaklee supplements had double-digit better biomarkers** of heart, brain, and cognitive health compared to non-supplement or single-supplement users
 - **The Telomere Study**
 - Based on research conducted by Elizabeth Blackburn, Ph.D., who was awarded the 2009 Nobel Prize for Medicine and is a Shaklee Scientific Board Advisor
 - **In a preliminary clinical study, users of Shaklee supplements for at least five years had a 40% lower rate of telomere shortening** across the adult age range compared to an age-matched healthy control group
 - Telomeres are the protective caps of repetitive DNA at the end of chromosomes. Over time, our telomeres gradually become shorter and telomere length is thought to be a marker of overall health.
